Solve Animal Bedding Waste With Us

# WHY GREENSCENE?

To create a win-win-win scenario for the environment, animals and people.

## THE GLOBAL CHALLENGE

The majority of people working with animal bedding have expressed concerns surrounding the sustainability of used bedding management practices. Large portions of the waste are being improperly disposed of, or dumped into landfills. This not only affects the nutritional value of the soil and the quality of the water we drink, but the environmental cost is immeasurable.

## THE IMPACT

### ENVIRONMENT

Millions of tons of poorly disposed animal bedding causes leaching, off-gassing and odor problems on a global scale.

### ANIMALS

Contaminated bedding causes respiratory infections and degenerative hoof conditions, leading to possible increased veterinary costs.

### OPERATION

Animal housing facilities are finding current animal bedding procurement and disposal costs to be expensive and unsustainable.

## THE SOLUTION

### **GreenScene** Bedding Recycling Plant

The GreenScene team will provide the expertise for a **carbon-neutral, sustainable waste management solution that runs on its own waste stream.** This substantially reduces the operators' hauling and transportation costs, creating a win-win-win scenario for the environment, animals and people.

**Our team will get you there,  
step by step.**

# HOW IT WORKS?

The GreenScene Plant will recycle used animal bedding through a patented, proven process.

Used bedding is collected, and the various elements (wood shavings, manure, fines, etc.) thoroughly blended. This mixture is then heat treated, the waste removed, and the recovered bedding is infused with organic essential oils.

The end result is our Premium, Recycled bedding, ready for use.

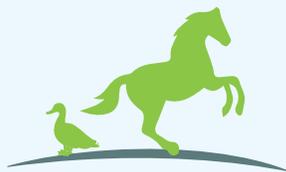

## BE PART OF THE TRANSFORMATION

### PROTECT The Environment

By reducing your facility's global footprint and contribute to a cleaner environment.

### ENJOY Healthier Animals

By reducing the incidence of respiratory infections and other health conditions.

### OPTIMIZE Operational Costs

The costs of procuring, hauling and disposing of animal bedding are significantly reduced or eliminated.

# OPTIMIZE RESOURCES, PROTECT THE ENVIRONMENT

Our purpose is to provide a sustainable waste management solution for used animal bedding, while being accountable to the environment, people and animals, as well as contributing to a promising future for generations to come.

We envision our planet as a clean and dignifying place, where humans and animals can perpetuate our long-term relationship and coexist in a waste-free environment.

## THE GREENSCENE ANIMAL BEDDING RECYCLING PLANT

After extensive research and development, GreenScene has developed the **GreenScene Bedding Recycling System**. Providing the service to local animal operations, the prototype GreenScene plant is now fully operational and producing large volumes of recycled, reusable bedding

GreenScene invites you to visit our facility, and see the plant in action. Learn how easily you can start running your own GreenScene Bedding Recycling Plant.

## CONTACT US

At GreenScene, our goal is to help create a healthier environment, both for ourselves, and the animals we care for. Contact us, and let us help you create a Complete Bedding Management System.
